

HOME....

The Oxford dictionary describes "Home" as a "Dwelling place...fixed residence of self and family...a place where one feels at ease, at rest....a refuge, an intimate place".

And homes are what Statewide Building Solutions are all about!!

Homes that are structurally sound....

Every STATEWIDE home is manufactured from Hi-tensile steel which is incredibly strong. Designed to conform to the stringent Australian earthquake codes and engineered to withstand minimum 150kph gales, easily exceeding usual safety standards. A home that provides a real feeling of security.

Homes that are great to look at....

Designed to sit comfortably anywhere and equally at home in the wide expanses of the Australian countryside or the intimacy of the suburbs. Homes to live in, to love in, to entertain in - homes that are an ideal extension of your own personality and reflect your very individual tastes and lifestyle. Homes to be proud of.

Homes that are easy to build....

All STATEWIDE wall and roof frames are manufactured to exacting tolerances and all the manufactured components fit perfectly making erection a simple, speedy and hassle free process. If you can use an electric drill, screwdriver and spanner, and read, you're qualified to build any STATEWIDE home.

Homes that are environmentally friendly....

Because the heart of the home is steel there is no need for harsh and potentially dangerous treatments to protect your home from termites. And every STATEWIDE home is fully insulated and meets the new "5 Star Energy Rating" criteria, reducing energy costs and enhancing indoor comfort.

Homes that are totally flexible in design....

Design flexibility is superb. Internal non-load bearing walls can be moved around however you wish to create the design that suits you to a tee - and usually at no cost to you. Homes that can be built on a concrete slab or a prefabricated floor system on stumps, with your choice of external cladding and internal finishes.
